

Paranormal World of Karen Ford

REPORT

Bramber Castle

Off A283 nr Steyning, West Sussex

26th December 2006

9pm – 12am

Arrival

On arrival in the car park there was not much to report, it was very quiet as the local pub was shut for the night, but not much else.

Tower

When we were stood by the tower I was very aware of bones being underneath the ground where we were standing. There was also a very uncanny coldness around the area just next to the tower.

Castle Wall

Once again, although with a completely different group of people, and having not told them anything about the other groups feelings and sightings, this group also sensed being watched and shadows moving in the far room ruins. Quite interesting.

Room Ruins

One of the others picked up on some gypsy children who were present around this area. A girl and two boys. Apart from that there was not much else to report.

Tree

The tree in the centre of the grounds which we went and stood underneath was the strangest part of the entire evening. As I was stood there one of my feet went very warm, I then asked if that was spirit if they could do the same to the other one, and yes it did happen! There was a feeling of a female drawing close but I couldn't get much more than this.

Conclusion

Again another interesting evening, but it is almost as if whatever is around it trying to hide r be kept secret. Maybe one day we will manage to get a much better connection and get more to happen in this area.
