

Paranormal World of Karen Ford

REPORT

Private Flat
Bognor Regis, West Sussex
27th February 2007
8pm – 1am

Arrival

On arrival outside the flat I became aware of 3 soldiers who would have been stationed very close to the house, if not just in front of it.

As soon as we walked into the flat, which was in a basement of what would have been a grand house at some stage I felt as if I was standing on bones. I could feel someone having been buried there, but without a coffin, just straight into the earth.

I was also made aware of a lady in her early 20s who was the mother to a young girl with blonde ringlets, who had her hair tied up with a pink ribbon. I could also see an older lady with grey hair tied up in a bun on top of her head. She would have been a housekeeper there and appeared to be continuing on with her duties as she had done when she was in the physical. She wore a long black dress.

I was also made aware of a male energy near the main bedroom who was watching and listening to us, but I couldn't make any more of a connection to him.

Passageway, bathroom and single room

As we were stood in the main hallway I was being very drawn to going down the passageway toward the single bedroom and the bathroom. The passageway felt as if it used to be a low ramp, rather than flat as it is now. I just had a big wanting to be at the end next to the wall by the bedroom and bathroom. The owner then informed me that there was a hidden room in this area which he had found when doing some building work on the flat. The room was emptied out of a lot of earth which had filled up the room and he had also found bones in there which he thought were from a baby. The police had taken these away and he had not heard any more about them since.

In the bathroom I was made aware of another lady who would have slept in this room. She suffered from a hip problem in the left side and would have walked a bit funny because of this.

Lounge and Dining Room

We tried some glass moving in here with no success. I was also not aware of any sort of activity in this area.

Main Bedroom

The owner of the flat had told us that this was the most active room in the flat and he had be fronted out by the spirit of a man in this room. He also never slept in there without the lights on. We tried a séance in this room without any success, we tried a séance with just women

to see if this would have any effect, but again nothing. I sat in there on my own in the dark and once again I sensed absolutely nothing and nothing happened.

Later we decided to try some glass moving in here. It did start to move quite quickly and a man came through, who told us his name was Fereu and that he was French and used to own the house. He gave us some other information and then the glass appeared to feel more aggressive. I felt the need to close down the circle which I then did.

Conclusion

Although I am sure there was some things picked up in the flat, I really don't feel that we got to the bottom of what had happened there in the past. There was nothing paranormal which we managed to pick up at all. I felt as if the male was not such a nice spirit, but it would have been good to have managed to connect with him a bit more. It almost felt that he was worried about being found out about something and wanted to hide behind a veil.
